Art Unit: 3304

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 20, 21, 22, and 34 are rejected under 35 U.S.C. 102(b) as being anticipated by Roehr for the reasons set forth in the previous action.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 23, 25, 26, 27, 28, 29, 30, and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Roehr for the reasons set forth in the previous action.

Claims 32 and 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over Augustine '188 in view of Roehr for the reasons set forth in the previous action and above.

Claims 35 and 36 are rejected under 35 U.S.C. 103(a) as being unpatentable over Roehr in view of Hardy for the reasons set forth in the previous action rejection based on Roehr in view of Hardy and above.

In response to applicant's further arguments the motivation to combine is to provide a head opening. Hardy suggests this motivation. Whether the blanket temperature be controlled by

Art Unit: 3304

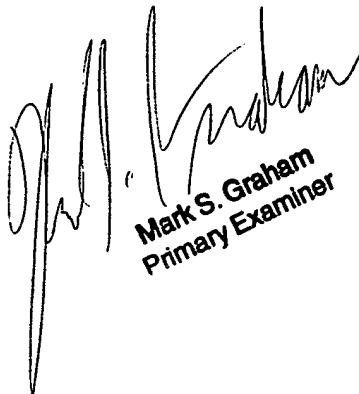

water or air such an advantage in a blanket would have been readily apparent to the ordinarily skilled artisan considering the art as a whole. Regarding applicant's final argument the test is not that one reference be bodily incorporated into another but what the references would have suggested to the ordinarily skilled artisan who is presumed to have at least a modicum of ability to engineer the added feature.

Claims 37-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Augustine in view of Roehr and Hardy for the reasons set forth in the above applications of Roehr and Hardy.

Claim 24 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
